DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The applicant teaches "folding the ashtray in 2". It is unclear to one of ordinary skill in the art if this means that the ashtray should be folded in half or more than once in order to keep the unwanted ashes and cigarette butts from falling out of the device.

Secondly, the applicant teaches that the invention may be any variation and any color that a discardable ashtray can be made of. The use of the word "variation" is extremely broad and has not been defined in the specification; therefore, for examination purposes, the examiner will interpret "variation" to mean "color".

The applicant also teaches that the ashtray is of recyclable aluminum foil. It is unclear to one of ordinary skill in the art whether the exterior, the interior or the entire ashtray is made of aluminum foil.

Claim 1 is rejected as failing to define the invention in the manner required by 35 U.S.C. 112, second paragraph. The claim(s) are narrative in form and replete with indefinite and functional or operational language. The structure, which goes to make up the device, must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The

Application/Control Number: 10/690,964

Art Unit: 1731

claim(s) must be in one sentence form only. Note the format of the claims in the patent(s) cited.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Zayas (U.S. Patent No. 5,224,499). Zayas teaches an ashtray light in weight (portable or pocket ashtray – claim 1), discardable (column 3, lines 45-49), of recyclable aluminum foil (aluminum lamina of the interior surface of the ashtray – column 3, lines 18-24) and not very expensive (column 3, lines 46-47). Once the person is finished smoking he/she can fold it in 2 capturing inside all unwanted cigarette ashes and cigarette butts (claim 2). Accordingly, claim 1 is rejected.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Zayas, as applied to claim 1 above. Zayas teaches that the ashtray is made out of cardboard.

Zayas fails to teach the color of the ashtray. However, cardboard is known to be of

different colors, i.e. white, brown, etc. It would have been obvious to one of ordinary skill in the art at the time of the invention to produce the ashtray in a multitude of colors for aesthetic purposes in order to attract a variety of customers to purchase the ashtray. Accordingly, claim 2 is rejected.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Moeller (U.S. Patent 4,896,825); Benavente et al (U.S. Patent No. 4,901,739).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carmen Lyles-Irving whose telephone number is (571) 272-2945. The examiner can normally be reached Monday through Friday from 8am-5pm.

Art Unit: 1731

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Steve Griffin can be reached on 571-272-1189. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
